HAMPSHIRE'S JOINT HEALTH AND WELLBEING STRATEGY

Hampshire's Joint Health and Wellbeing Strategy 2013–2018

Working with you for a healthier Hampshire

- **Starting Well** – *so every child can thrive*
- **Living Well** – *so people choose to live healthier lives*
- **Ageing Well** – *so people remain independent, have choice and control and timely access to high quality services*
- **Healthier Communities** – *so people live in strong and supportive communities*

DEVELOPMENT PROCESS (1)

- JSNA provided the four strategic areas
- Developed a plan on page via March 2012 seminar
- Draft consultation document presented to 100 partners in June Workshop
- Draft consultation approved 6 July 2012 and agreement for 3 month consultation
- Consultation provided a clear mandate for improved joint working and “*services to talk to one another*”, providing help to “*those who need it most*” and the “*general public doing things differently*”

DEVELOPMENT PROCESS (2)

- Over 1200 people took part in the consultation. There were 50 different events and provided 800 comments
- Feedback from the consultation shared at the 15 November 2012 HSHWB and agreed criteria to create a small number of priorities
- 7 December 2012 HSHWB workshop to reduce priorities
- January 2013 first draft of JHWS discussed by Executive Group

MAKING A DIFFERENCE

The Strategy will focus on supporting:

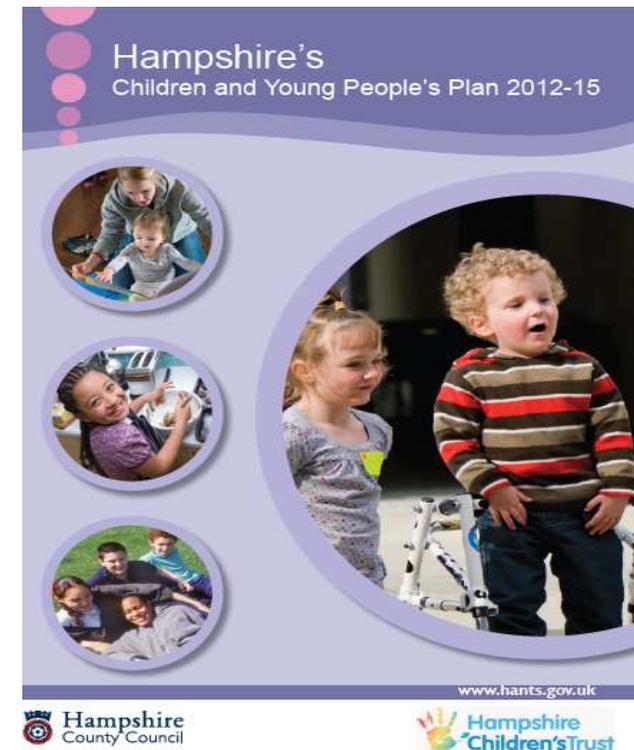

- Fewer people die from preventable ill health
- Reducing health inequalities across Hampshire
- Improving community based services so that fewer people need costly hospital and long term care

STARTING WELL

Provide strategic cooperation so that the Children and Young Peoples Plan can be delivered:

YEAR 1 FOCUS:

Children with disabilities and their families have access to high quality services that support smooth transition between child focused and adult orientation services

LIVING WELL – *people choose to live healthier lifestyles*

Fewer people die from preventable ill health

- Reduction in diagnosed illness and death from alcohol attributable disease at all ages
- Reduction in diagnosed illness and death from tobacco attributable disease at all ages
- Reduction year on year in the rise of obesity
- Support delivery of ‘No health without mental health’
- Increase early detection of HIV and Chlamydia and prevention of teenage pregnancy

AGEING WELL

Adults in need of treatment, care and support have choice, control and timely access to high quality services, based on need:

- Close the prevalence gap in long term conditions within the Hampshire population
- Meet the dementia challenge
- More people helped to live safely at home
- Reduced premature deaths of people with learning disability
- Personalised support for both carers and those they support so as to reduce carer breakdown
- Fewer people falling and suffering the consequences
- Reduction in hospital stays when patients are medically fit to leave

HEALTHIER COMMUNITIES

Supporting the development of strong, supportive communities

- Increased availability of information and advice
- Strategic focus on communities and groups with the worst health outcomes
- Reduce the personal, social and public service costs of families with complex needs

NEXT STEPS

To add your support to Hampshire's Joint Health and Wellbeing Strategy so that it can progress to be adopted by Hampshire Health and Wellbeing Board at the inaugural meeting in summer 2013.
